CONTENTS AND GENERAL INDEX

OF THE

TRANSACTIONS

OF THE

American Society of Mechanical Engineers,

VOLS. I., II., III., IV., V.

NEW YORK:
PUBLISHED BY THE SOCIETY,
AT THE OFFICE OF THE SECRETARY,
15 CORTLANDT STREET.
1884.

PAPERS PRESENTED

TO THE

AMERICAN SOCIETY OF MECHANICAL ENGINEERS.

FROM

November, 1880, to May, 1884.

Vol. I.

		Page
II.	The Field of Mechanical Engineering, A. L. Holley	23
III.	President's Inaugural Address, R. H. Thurston	7
IV.	The Metric System, Coleman Sellers	29
V.	Regenerating Metallurgic Furnaces, Jacob Reese	57
VI.	Putting a New Crank-pin in the Engine of the S. S. Knickerbocker, Lewis Johnson	69
VII.	Measurement of the Friction of Lubricating Oils, C. J. H. Woodbury	73
VIII.	Strength in Machine Tools, C. T. Porter	119
IX.	Standard Sizes of Screw Threads, G. R. Stetson	123
X.	An Adaptation of Bessemer Plant to the Basic Process, A. L. Holley	131
XI.	Friction as a Factor in Motive Power Expenses, John E. Sweet	143
XII.	High Ratios of Expansion and Distribution of Unequal Pressures in Single and Compound Engines, J. C. Hoadley	155
XIII.	The Value of the Study of the Mechanical Theory of Heat, A. R. Wolff	211
XIV.	Efficiency of the Crank, S. W. Robinson	221
XV.	Mechanical Correctness, Charles A. Hague	239
XVI.	Packing for Piston Rods and Valve Stems, L. F. Lyne	243
XVII.	Cushion Adjustment in Engines, S. W. Robinson	255
XVIII.	On Practical Methods for Greater Economy of Fuel in the Steam Engine, Allan Stirling	265

Vol. II.

XX.	A Rational System of Piston Packing, S. W. Robinson	19
XXI.	Experiments with Non-conductors of Heat, Charles E. Emery	34
XXII.	Alteration to the Cross-head of a Corliss Engine, Charles E. Emery	40
XXIII.	Use of the Calorimeter as a Pyrometer for High Temperatures, J. C. Hoadley	42
XXIV.	Experimental Mechanics, Oberlin Smith	55
XXV.	The Continuous Rod-mill of the Trenton Iron Co., William Hewitt	70
XXVI.	Standard Measurements, Geo. M. Bond	80
XXVII.	Formula for Horse-power of Leather Belts, A. F. Nagle	91

PAGE

XXVIII. An Improved Mercury Column, D. N. Melvin..... 98
XXIX. The First Rolling Mill in America, William H. Harrison..... 103
XXX. The Superior, E. D. Leavitt, Jr..... 106
XXXI. A Brief Treatise on the Steamboat Cam, Lewis Johnson..... 122
XXXII. On the Ratio of Expansion at Maximum Efficiency, R. H. Thurston..... 128
XXXIII. Most Economical Point of Cut-off in Steam Engines, Alfred R. Wolff; James E. Denton (*First paper*)..... 147
XXXIV. Discussion of XXXII. and XXXIII..... 180
XXXV. On the Most Economical Point of Cut-off in Steam Engines, Alfred R. Wolff; Jas. E. Denton (*Second paper*)..... 281
XXXVI. The Binary Absorption System of Ice Machinery, H. F. J. Porter. 212
XXXVII. Experiments on the Adhesion of Leather Belts, Samuel Webber. 224
XXXVIII. In Memoriam, Henry Rossiter Worthington..... 228
XL. Counterbalancing of Engines and other Machinery having Reciprocating Parts, S. W. Robinson..... 243
XLI. Comparisons between Different Types of Engines, Charles A. Hague..... 287
XLII. Rolled Cast-steel Car Wheels, Jacob Reese..... 293
XLIII. Fire Protection of Mills, C. J. H. Woodbury..... 301
XLIV. Coffin's Averaging Instrument, John E. Sweet..... 335
XLV. Note Relating to the proper Method of Expansion of Steam and Regulation of the Engine, R. H. Thurston..... 338
XLVI. The Latest Methods of Sub-marine Telegraph Work, T. W. Rae, 349
XLVII. Nomenclature of Machine Details, Oberlin Smith..... 358
XLVIII. Method of Arranging and Indexing Drawings and Patterns, Albert F. Hall..... 369
L. Our Progress in Mechanical Engineering, Annual Address, R. H. Thurston..... 415
LI. An Improved Method of Screw Propulsion, John B. Root..... 442
LII. Mill Floors, C. J. H. Woodbury..... 468
LIII. A Self-packing Valve, H. F. J. Porter..... 499
LIV. The Lifetime or Age of Steam Boilers, W. B. Le Van..... 503
LV. Railroad Economics, or Notes and Observations from the Ohio State Railway Inspection Service, S. W. Robinson..... 524
LVI. A New Method of Keeping Mechanical Drawings, C. T. Porter... 560

Vol. III.

LVIII. A Tribute to Alexander Lyman Holley, James C. Bayles..... 34
LIX. Introductory Remarks and Responses at the Holley Memorial Session..... 48
LX. Determination of Heating Surface required in Ventilating Flues, W. P. Trowbridge..... 67
LXI. Efficiency of Turbines, as affected by Form of Gate, Samuel Webber..... 78
LXII. The Appointment of an U. S. Government Commission of Tests of Metals and Constructive Materials, Thomas Egleston..... 80
LXIII. A Standard Gauge System, Geo. M. Bond..... 122
LXIV. Thermo-Dynamics of certain Forms of the Worthington and other Compound Pumping Engines, S. W. Robinson..... 130

PAGE

LXV. The Specific Heat of Platinum, and the use of this Metal in the Pyrometer, J. C. Hoadley..... 174
LXVI. Chronograph for Engineering Purposes, with the Hipp Escapement, W. R. Eckart..... 184
LXVII. Built-up Work in Engine Construction, Horace See..... 195
LXVIII. An Essay on Mechanics, and the Progress of Mechanical Science, 1824 to 1882, with Introduction by Coleman Sellers, F. Fraley. 199
LXIX. Averaging Machines, W. S. Auchincloss..... 205
LXX. Expansion of Steam and Water without Transfer of Heat, A. F. Du Faur..... 208
LXXI. Description of the Edison Steam Dynamo, T. A. Edison, C. T. Porter..... 218
LXXII. Note on the Action of a Sample of Mineral Wool used as a Non-conductor around Steam Pipes, F. R. Hutton..... 228
LXXIII. On a Theorem of Rankine relating to the Economy of Single-acting Expansion Engines, first published in 1851, W. P. Trowbridge..... 236
LXXIV. On the Several Efficiencies of the Steam Engine, and on the Conditions of Maximum Economy, R. H. Thurston..... 245
LXXV. Report of a Trial of Upright Boilers and Worthington Compound Pumping Engine at Roxbury Pumping Station, J. S. Coon.... 290
LXXVI. Note on the Economy of the Windmill as a Prime Mover, A. R. Wolff..... 299
LXXVII. Spring-face for Poppet Valves, Gram Curtis* .....
LXXVIII. Screw Propulsion (*Second paper*), J. B. Root†.....
LXXIX. Steam and Air Economy, Samuel McElroy.....
LXXX. Steel Ships and Modifications of Models to meet the Requirements of the Ocean Carrying Trade. H. H. Gorringe.....
LXXXI. The Positions of Views upon Mechanical Drawings, Oberlin Smith‡.....
LXXXII. Feed-water Heater Performance, A. F. Nagle.....
LXXXIII. The Strength of Wood Columns as determined at the Watertown Arsenal, Gaetano Lanza§.....
LXXXIV. The Strength of Members of Wrought-Iron and Steel Bridges, S. W. Robinson‖.....
LXXXV. The Fly-wheel, William Johnson¶.....
LXXXVI. Corrosion of the Propeller-shaft of the S. S. City of New York, Charles Sperry.....
LXXXVII. Determination of the Capacity of the U. S. Standard Gallon, W. E. Partridge.....

Vol. IV.

XCI. Alexander Lyman Holley, a Memorial Address, R. W. Raymond. 35
XCII. The Mechanical Engineer, his Work and his Policy, President's Annual Address, R. H. Thurston..... 75

---

PAGE

XCIII. The Rail Cambering Arrangement of the Lackawanna Iron & Coal Co., W. K. Seaman..... 106
XCIV. An Account of Certain Tests of the Strength and Stiffness of Large Spruce Beams, Gaetano Lanza..... 119
XCV. Adjustable Cut-off for Marine Engines, H. S. Hayward..... 136
XCVI. The Protective Value of Boiler Inspection, F. B. Allen..... 142
XCVII. Back Pressure on Valves, S. W. Robinson..... 150
XCVIII. Belting to connect Shafts which are not Parallel, and do not Intersect, J. B. Webb..... 165
XCXIX. A New Form of Steam Engine Indicator, J. B. Webb..... 182
C. Difficulties of Road Locomotion, their Cause and Cure, C. C. Hill..
CI. The Systematic Preservation of Drawings, Oberlin Smith *.....
CII. Supplement to Thermo-Dynamics of the Worthington and other Compound Pumping Engines, S. W. Robinson †.....
CIII. Technical Schools for Artisans, Alfred Colin.....
CIV. Launching Ships Side-on, Norman Wheeler.....
CV. Refractory Materials, T. Egleston.....
CVII. The Marine Engines on the Lakes, and a Device for getting them off the Dead Centres, J. F. Holloway..... 211
CVIII. History and Development of Winding and Pumping Machinery in the Anthracite Coal Regions of Pennsylvania, Howell Green.. 217
CIX. On a Newly-discovered Variation in the Effect of Prolonged Stress on Iron, R. H. Thurston..... 224
CX. A New Form of Balance Dynamometer, S. S. & W. O. Webber.. 227
CXI. A New Method of Constructing a Crank Shaft, John E. Sweet... 231
CXII. Economy by Subdivision in Installation and Operation of Power and Machinery, under Varying Demand, Julius L. Hornig.... 233
CXIII. A New Method of Casting Flange Pipe, John E. Sweet..... 237
CXIV. Remarks upon the Ordinary Form of Bessemer Ingot Cranes, Gram Curtis..... 239
CXV. The Evaporative Power of Bituminous Coals, William Kent.... 249
CXVI. Balanced Valves, C. C. Collins..... 268
CXVII. On Standard Cast-iron Fittings, William J. Baldwin..... 274
CXVIII. Cranes; a Study of Types and Details, Henry R. Towne..... 288
CXIX. Mechanism for Manœuvring Clutch Couplings, W. F. Durfee.... 311
CXX. Economy in Lubrication of Machinery, Geo. N. Comly..... 315
CXXI. Some of the Mechanism employed in Multiplex Telegraphy, T. W. Rae..... 321
CXXII. Spiral Springs, Oberlin Smith..... 335
CXXIII. The Bower-Barff Rustless Iron Process, Geo. W. Maynard..... 351
CXXIV. Reuleaux's Kinematic Models (Abstract), J. B. Webb..... 367
CXXV. Balanced Vertical Engines, W. F. Durfee..... 368
CXXVI. Beton in Combination with Iron as a Building Material, W. E. Ward..... 388
CXXVII. Note Relating to Water-hammer in Steam Pipes, R. H. Thurston.. 404
CXXVIII. Notes on Steel, G. C. Henning..... 410

Vol. V.

		Page
CXXX.	Motion Curves of Cut-off Valves, A. Wells Robinson	34
CXXXI.	A New Valve Motion, Carl Angstrom	41
CXXXII.	Compression as a Method of Governing, Harris Tabor	48
CXXXIII.	Pressure obtainable by the Use of the Drop Press, R. H. Thurston	53
CXXXIV.	A Tilting Water Meter for Purposes of Experiment, J. C. Hoadley	63
CXXXV.	Experiments upon Non-conducting Coverings for Steam Pipes, with Introduction by C. J. H. Woodbury, John M. Ordway	73
CXXXVI.	American Machinery at International Exhibitions, Thomas R. Pickering	113
CXXXVII.	A Power Crane, W. F. Durfee	131
CXXXVIII.	A Machine for Testing the Physical Properties of Metals and Alloys, T. Egleston	140
CXXXIX.	Machine-shop Algebra, Oberlin Smith *	
CXL.	A New Theory of the Turbine, R. H. Thurston †	
CXLII.	Helical Springs, John W. Cloud	173
CXLIII.	A Drawing Office System, Henry R. Towne	193
CXLIV.	A Positive Speed Indicator, Oberlin Smith	206
CXLV.	Experiments upon Non-conducting Coverings for Steam Pipes (*Second paper*), John M. Ordway	212
CXLVI.	On a Practical Solution of the Perfect Screw Problem, W. A. Rogers	216
CXLVII.	Rules for Conducting Boiler Tests, W. Kent	260
CXLVIII.	Estimates for Steam Users, Charles E. Emery	282
CXLIX.	New York to Chicago in 17 Hours, W. B. Le Van	301
CL.	Comparison of Three Modern Types of Indicators, Geo. H. Barrus	310
CLI.	Report on Natural Gas, Appendix	340

* Republished in full in *Mechanics*, Nov. 17, 1883.

GENERAL INDEX.

VOLUMES I., II., III., IV., V.

OF THE

TRANSACTIONS OF THE AMERICAN SOCIETY OF MECHANICAL ENGINEERS.

[NOTE.—In the headings, the names of authors and speakers are printed in SMALL CAPS., and the full titles of papers are printed in *italic type*, for ease of reference. The Roman figure denotes the number of the volume, and the Arabic figures which follow it give the pages.]

Absorption System of Ice Machinery, H. F. J. Porter..... II. 212
Absorptive Power of Vapor..... I. 185
Acceleration of Moving Parts of Edison-Porter Dynamo..... III. 222
Account of Strength and Stiffness of Large Spruce Beams, G. Lanza.... IV. 119
Adaptation of Bessemer Plant to Basic Process, A. L. Holley..... I. 131
Address of Mayor of Cleveland..... IV. 195
Address, Memorial of A. L. Holley, R. W. Raymond..... IV. 35
Address, Annual, of R. H. Thurston, 1881..... II. 415
" " " " " 1882..... IV. 75
" Inaugural of " " 1880..... I. 7
Adhesion of Leather Belts, S. Webber..... II. 224
Adjustable Cut-off for Marine Engines, H. S. Hayward..... IV. 136
Admission of Steam, angle for..... I. 23
Advantages of Cambering Machine..... IV. 114
" " Vertical Engine..... IV. 378
Aeronautics, Progress in.....II. 437; IV. 94
Age or Lifetime of Steam Boilers, W. B. Le Van..... II. 503
Air Heating in Flues..... III. 68
Air Space, Efficiency of..... V. 103
Airy's Formula..... II. 83
Akerman on Ferro-Phosphorus Alloys..... III. 87
ALDEN, G., disc. Adhesion of Leather Belts..... II. 228
" " " Formulæ for Leather Belts..... II. 97
ALLEN, F. B., *Protective Value of Boiler Inspection*..... IV. 142
" " disc. Screw Propulsion..... II. 468
" " " Age of Steam Boilers ..... II. 517
Alloys of Maximum Strength..... II. 416
" " Copper for Burners and Cartridges..... III. 93
Alteration to Cross-head of Corliss Engine, C. E. Emery..... II. 40
Amendment to Rules..... II. 7, 12, 236, 237, 390, 412
" " ..... IV. 10, 11
" " Committee on..... IV. 15
American Association for the Advancement of Science..... V. 29
American Machinery at Internat. Exhibitions, T. R. Pickering..... V. 113

Analysis of Blast Furnace Slags..... III. 233
ANGSTROM, C., *New Form of Valve Motion*..... V. 41
Annealing Furnace for Copper..... V. 150
Annual Address, R. H. Thurston, 1881..... II. 415
" " " 1882..... IV. 75
Annual Cost of Steam Power..... III. 255
" Meeting, Change of Date..... IV. 14
" " Proceedings of 1880..... I. 1
" " Proceedings of 1881..... II. 383
" " " 1882..... IV. 3
" " " 1883..... V. 3
Anvils for Drop Press..... V. 60
Appendix to Bessemer Ingot Cranes..... IV. 245
" " Estimates for Steam Users..... V. 290
" " Notes on Steel..... IV. 415
" on Natural Gas..... V. 340
Application of the Efficiency Diagram..... III. 274
Appointment of U. S. Commission on Test of Materials, T. Egleston.... III. 80
Armature of Edison Dynamo..... III. 219
AUCHINCLOSS, W. S., *Averaging Machines*..... III. 205
Automatic Sprinklers..... II. 326
Averaging Instrument, Coffin's, J. E. Sweet..... II. 335
Averaging Machines, W. S. Auchincloss..... III. 205

Babbitt Metals for Journals.....III. 225, 227; V. 153
" " " " Pressures Allowable on..... III. 227
BABCOCK, G. H., disc. Friction as a Factor..... I. 151
Back Pressure as Modifying Economy..... III. 283
Back Pressure on Valves, S. W. Robinson..... IV. 150
Balance Cylinder for Vertical Engine..... IV. 376
Balanced Dynamometer, New Form of, S. S. & W. O. Webber..... IV. 227
Balanced Valves, see also Valves, Balanced.
Balanced Valves, C. C. Collins..... IV. 268
Balanced Valves, in the "Superior"..... II. 114
Balanced Vertical Engines, W. F. Durfee..... IV. 368
Balancing of Straight Line Engine..... IV. 386
BALDWIN, W. J., *Standard Cast Iron Fittings*..... IV. 274
" " disc. Balanced Vertical Engines..... IV. 384
BARNES, P., disc. Power Cranes..... V. 138
BARR, W. M., disc. Test Commission..... III. 106, 119
" " " Edison's Steam Dynamo..... III. 227
" " " Mineral Wool..... III. 232
" " " Standard Fittings..... IV. 280
" " " New Valve Motion..... V. 46
" " " Non-conducting Coverings..... V. 107
BARRUS, G. H., *Comparison of Three Modern Types of Indicators*..... V. 310
Basic Process, Adaptation of Bessemer Plant for..... I. 131
BAYLES, J. C., *Tribute to A. L. Holley*..... III. 34
Bed-plate for Vertical Engine..... IV. 369
Belt Formula, A. F. Nagle..... II. 91
Belt Formula, by Morton..... II. 96

Belt Velocity ..... II. 94
Belting to Connect Shafts which are not Parallel, J. B. Webb ..... IV. 165
Belting Rolling Mills ..... II. 76
Belts, Coefficient of Friction of ..... II. 93
" *Experiments on Adhesion of*, S. Webber ..... II. 224
" Strength and Tension of ..... II. 92
BENNETT, T., On Pemberton Mill Failure ..... II. 271; III. 25
Bessemer Ingot Cranes, G. Curtis ..... IV. 238
" *Process, Adaptation of Plant for Basic* ..... I. 131
" " Output in ..... I. 138
Beton with Iron as a Building Material, W. E. Ward ..... IV. 388
" and Iron for H. R. Tunnel ..... IV. 394
" House Struck by Lightning ..... IV. 402
Binary Absorption System of Ice Machinery, H. F. J. Porter ..... II. 212
Bituminous Coals, Evaporative Power of, W. Kent ..... IV. 249
Blue Limestone, as Filling for Beton ..... IV. 390
Boiler and Furnace Efficiencies ..... III. 247
Boiler Explosions Early in 19th Century ..... IV. 142
" " Causes of ..... IV. 143
" " Commission on ..... II. 59
" for High Pressures ..... I. 268
" " the "Superior" ..... II. 112
Boiler Inspection, Protective Value of, F. B. Allen ..... IV. 142
Boilers, Lifetime or Age of, W. B. Le Van ..... II. 503
Boilers, Long, Support of ..... IV. 146
" of the "Livadia" ..... IV. 418
" Sectional ..... IV. 91
Boiler Tests, Rules for Conducting, W. Kent ..... V. 260
BOGART, J., A. S. C. E., on Test Commission ..... V. 12
BOND, G. M., *Standard Measurements* ..... II. 80
" " " *Gauge System* ..... III. 122
" " disc. Arrangement and Indexing of Drawings ..... II. 378
" " " Drop Press ..... V. 62
" " " Perfect Screw Problem ..... V. 243
Bower-Barff Process for Rustless Iron, G. W. Maynard ..... IV. 351
Bramah's Lock ..... V. 124
BRASHEAR, J. W., disc. Perfect Screw ..... V. 257
Brass, Manufacture of ..... V. 148
Brass Tubes in Reheater of Compound Engine ..... II. 113
Breaking Block for Cranes ..... IV. 244
Bridge at Grenoble ..... V. 111
Bridge Indicator ..... II. 536
" Strains ..... II. 532
" Timber, Fractures of ..... IV. 132
" Vibrations and Lurches ..... II. 535
Bridges, Iron, for Railroads ..... II. 530
" of Long Span ..... IV. 78
" Steel, for Railroads ..... II. 534; IV. 410
" Wooden, " ..... II. 527
Brief Treatise on the Steamboat Cam, L. Johnson ..... II. 122
Briggs's Scales ..... IV. 277

Brigg's Standard for Fittings ..... IV. 274
Brown's Testing Device ..... V. 317
" Valve Motion ..... V. 46
Built-up Work in Engine Construction, H. See ..... III. 195
Burnham Turbine Wheel Test ..... III. 79
Burnishing of Copper Rolls ..... V. 155

Calorimeter as Pyrometer, J. C. Hoadley ..... II. 42
Cam for Steamboat, Brief Treatise on, L. Johnson ..... II. 122
Cambering Arrangement, Lackawanna I. & C. Co., W. K. Seaman ..... IV. 106
" Machine, Advantages of ..... IV. 114
Canning, E. W. B., on A. L. Holley ..... IV. 39
CAPEN, T. W., disc. Cranes ..... IV. 308
Carbonic Oxide Gas for Boilers ..... I. 275
Carel Locomotive ..... II. 276
Car Springs ..... V. 189
Cartridges and Burners, Alloys of Copper for ..... III. 93
Car Wheels, Rolled Cast Steel, J. Reese ..... II. 293
Cast Iron Fittings, W. J. Baldwin ..... IV. 274
Casting Flange Pipe, New Method of, J. E. Sweet ..... IV. 237
Caulking of Boiler Joints ..... IV. 429
Causes of Boiler Explosions ..... IV. 143
Chains versus Ropes in Cranes ..... IV. 295
Change of Annual Meeting ..... IV. 14
Changes of Temperature in a Beton House ..... IV. 402
Charcoal, Combustibility of ..... V. 101
Chronograph for Engineering Purposes, W. R. Eckart ..... III. 184
" on Lowell Pumping Engine ..... III. 191
Chronoscope ..... III. 186
CHURCH, W. L., disc. Friction as a Factor ..... I. 154
" " " Expansion in Single and Compound Engine ..... I. 179
Circulars on Commission to Test Iron and Steel ..... IV. 31
Clark's Rule for Counterbalancing of Engines ..... II. 273
Clearances in Compound Engine ..... I. 173
CLOUD, J. W., *Helical Springs* ..... V. 173
Clutch Couplings, Mechanism for Manœuvring, W. F. Durfee ..... IV. 311
Coal Beds of Pennsylvania Classified ..... IV. 217
" *Bituminous, Evaporative Power of*, W. Kent ..... IV. 249
" per H. P. in Locomotives ..... II. 278, 280
Coefficients of Friction at 100° ..... I. 88
Coffin's Averaging Instrument, J. E. Sweet ..... II. 335
Cold Rolling, Effect of ..... II. 417
COLE, J. W., disc. Estimates for Steam Users ..... V. 298
COLLINS, C. C., *Balanced Valves* ..... IV. 268
" " disc. Cranes ..... IV. 307
Col. Laidley's Communication ..... IV. 20
Colliery Hoisting Engines ..... IV. 218
" Pumps ..... IV. 220
Combustibility of Mill Floors ..... II. 497
Combustion Chamber ..... I. 274
COMLY, G. N., *Economy in Lubrication of Machinery* ..... IV. 315
" " disc. Balanced Vertical Engines ..... IV. 384

Commission to Test Explosion of Boilers ..... II. 59
" of 1868 to Test Iron for U. S. Forts ..... III. 87
" *to Test Iron and Steel, and Other Materials*, T. Egleston... III. 80
Committee, Local, New York, 1882 ..... IV. 1
" " Cleveland, 1883 ..... IV. 193
" " New York, 1883 ..... V. 3
" " Pittsburgh, 1884 ..... V. 159
" on Holley Memorial Report ..... V. 15
" " Nominations, 1880 ..... I. 3
" " " 1883 ..... IV. 199
" " " 1884 ..... V. 162
" " Rules, 1880 ..... I. 4
" " Revision of Rules ..... IV. 15, 199; V. 164
" " Rules for Conducting Boiler Tests ..... V. 170

" " Invitation of Foreign Members ..... III. 6; V. 17
" " Tests of Iron and Steel ..... III. 6
" " Experiments on Steam Boilers ..... III. 7
" " National Bureau of Information and Standards ..... III. 19
" " Horse-power of Boilers ..... III. 20
" " Gauges and Standards, Report of ..... IV. 21
" " Standard Gauges ..... III. 14
" " Test Commission, Report of ..... IV. 29; V. 9
" Standing, Appointed 1880 ..... I. 6
Communication from Col. Laidley ..... IV. 20
" on Uniform Standards for Test Specimens ..... V. 164
Comparator, Pratt & Whitney Co ..... II. 80; III. 122
Comparison between different Types of Engines, C. A. Hague ..... II. 287
" of Standard Inches ..... III. 125
" " *Three Modern Types of Indicators*, G. H. Barrus ..... V. 310
" " Johnson's and Meigs' Results ..... IV. 250
" " Vertical and Horizontal Engines ..... IV. 385
Compound Engines, Economy and Cost of ..... I. 187
" " Clearances in ..... I. 173
" " Uniform Rotation in ..... I. 174
" " Uniform Propulsive Energy of ..... I. 180
" " Coal per H. P. in ..... I. 188
" " Propeller ..... IV. 213
" " Cost of ..... I. 182
" Engine, Brass Tubes for Reheater ..... II. 113
" " High Ratios of Expansion in ..... I. 55
" " Governor in ..... I. 179
" " and Single, Economy of ..... I. 22
" " Receiver of ..... I. 178
" " Wire-drawing in ..... I. 174
" " Pumping at Toronto ..... I. 179
Compress, Cotton, Failure of ..... III. 106
Compressed Air by Windmills ..... III. 306
" Steel ..... IV. 79
Compression as a Method of Governing, H. Tabor ..... V. 48
" in Steam Cylinder ..... II. 341

Computed Specific Heat of Platinum ..... III. 181
Condensation in Steam Jackets ..... I. 172
" " Long Steam Pipes ..... V. 106
Condensing Engine, Cost of ..... II. 286
Conditions of Equal Work in Worthington Engines ..... III. 151
Constitution of U. S. Commission for Testing Materials ..... III. 99
Construction of an Efficiency Diagram ..... III. 271
" " Mill Floors ..... II. 491
Continuous Rod Mill of Trenton Iron Co., W. Hewitt ..... II. 70
" Lubrication with Grease ..... IV. 316
Convection of Air ..... I. 38
COON, J. S., *Trial of Upright Boiler and Engine at Roxbury Pumping Station* ..... III. 290
Copper Castings, Flux for ..... V. 152
" " Color of ..... V. 154
Cored Flanges for Cast Pipe ..... IV. 237
Corliss Engine, Alteration of Cross-head of, C. E. Emery ..... II. 40
" " for Roll Train ..... II. 71
" " High Speed of ..... II. 74
